

## **Annual Report of Physics Department (2023-24)**

The Physics Department of Nutan Arts College achieved significant milestones during the academic year 2023-24. We prioritized high-quality teaching and holistic student development, ensuring a conducive environment for academic excellence and confidence building.

To enhance students' skills and exposure, we organized a Student Seminar, which encouraged active participation and helped students improve their communication and presentation abilities. Additionally, a Poster Presentation Competition on physics-related topics was conducted, fostering creativity, scientific inquiry, and teamwork among students.

A highlight of the year was confidently presenting our department's achievements and activities to the NAAC Committee, showcasing our commitment to academic excellence and innovative teaching methods.

This year has been a testament to our dedication to nurturing young minds and making physics an engaging and enriching experience. We look forward to continuing our journey of academic and co-curricular success in the coming years.
