

# Department of chemistry

## Tour Report

# Student list for tour

There are 18 students in our department in T.Y.Bsc (Chemistry)

Our department is arranging a tour that is an industrial tour for students. Students are enjoying and getting so much knowledge during the industrial tour.

In this tour, students are getting ideas about work and all processes which happen in an industry, as well as how the product is produced and packaged, marketed, and so on.

Sr.No	Name of student

## Wine Fermentation:-

For the wine to ferment, winemakers add yeast to the grape juice. These yeasts convert the natural sugars of the grapes into ethanol and carbon dioxide (which is a byproduct that gets released into the atmosphere and isn't important for the wine).
